SUMMARY

Aspiring Full-Stack Developer with experience in React.js, Node.js, Spring Boot, MySQL, and MongoDB. Skilled in developing responsive web applications, REST APIs, and backend optimization, with a passion for building efficient and user-centric solutions.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Bootstrap

Backend: Java, Spring Boot, Node.js, Express.js

Database: MySQL, MongoDB

Tools & Technologies: Git, GitHub, VS Code, Postman, Maven, REST APIs, JWT Authentication, K6 (Load Testing)

Concepts: Responsive Web Design, MVC Architecture, Authentication & Authorization, Database Indexing,

Software: Microsoft Office, Zoom

Soft Skills: Problem-Solving, Analytical Thinking, Team Collaboration, Communication, Time Management

PROJECT

Ivory Crest luxury Hotel Booking and Management System

Academic Project • ivorycrest.vercel.app • April 2026 - May 2026

- Developed a full-stack **Hotel Booking and Management System** using **React.js, Node.js, Express.js, and MongoDB**, consisting of **3 user modules** (Admin, Receptionist, and Customer) with a responsive user interface.
- Implemented **JWT-based authentication** and **role-based access control**, securing access across **3 user roles** and multiple protected API endpoints.
- Built **8+ core features**, including room booking, real-time availability checking, booking cancellation/rescheduling, payment workflow, email notifications and an analytics dashboard.
- Optimized backend performance using **MongoDB indexing, query optimization, connection pooling, response compression, and asynchronous email processing** and **load tested the application with up to 450 concurrent users using K6**.

Monarch Forecast

Personal Project • monarch-forecast.vercel.app • June 2026 - June 2026

- Developed a responsive **Weather Forecast Web Application** using **React.js** and **CSS3**, featuring a modern and mobile-friendly user interface.
- Integrated the **OpenWeather API** to fetch and display **5+ real-time weather metrics**, including temperature, humidity, wind speed, weather conditions, and location details.
- Implemented **city-based weather search** using **React Hooks** enabling dynamic data fetching and real-time UI updates.
- Designed a fully responsive interface with **5+ reusable React components**, ensuring a consistent experience across desktop and mobile devices.
- Implemented API error handling, loading states, and optimized data fetching to deliver a smooth and reliable user experience.

Exploria Travelling Website

Personal Project • exploria1.vercel.app • August 2025 - August 2025

- Developed a responsive **Travel Booking Website** using **HTML5, CSS3, JavaScript, and Bootstrap**, featuring **5+ destination** with a mobile-friendly user interface.
- Designed and implemented **4+ interactive web pages** for destination browsing travel package exploration and booking using dynamic JavaScript functionality.
- Built a **real-time booking cost calculator** that dynamically updates pricing based on destination, travel dates and the number of travelers,
- improving booking accuracy.
- Utilized **Bootstrap's responsive grid system and reusable UI components** to ensure seamless compatibility across desktop and mobile devices.
- Deployed the application on **Vercel**, delivering a fast, responsive travel booking platform with an optimized user experience.

EXPERIENCE

Java Backend Developer
Scontinent Technologies Pvt Ltd
Bangalore

November 2025 - December 2025,

- Designed and optimized MySQL database schemas and queries, handling 1,000+ records with improved retrieval performance.
- Implemented CRUD operations and basic authentication modules, enabling secure access for 100+ application users.
- Tested and validated APIs using Postman, executing 200+ test requests to ensure reliability and error handling.
- Collaborated with frontend developers to integrate 10+ API endpoints, ensuring smooth data flow and seamless user experience.

EDUCATION

Bachelor of Computer Applications (BCA)
Bangalore University • Bangalore • 2026 • 8GPA
